In this regard, a Pre-Indent Conference (PIC) is being organized to finalize the broad technical specifications of the required items as mentioned below. Prospective OEM/Distributors/ having capabilities to supply, installation, commissioning and maintenance of such required item/system are invited to make technical presentations during the PIC followed by discussions on technology, design, features, utility, technical parameters, warranty, AMC and other related Techno-commercial issues. Schedule of Pre-Indent Conference is as follows:-

| Sr. No. | TENDER No. | Item(s) | Date & Time | Venue |
|---------|------------|--|-----------------------|----------------------------|
| 1. | 05/2016 | Complete Canning Unit for Food Processing Retort Processing Unit | 02-03-2017 11.00am | Director's Conference Room |

Canning is a retort or aseptic processing of perishable vegetable/fruit products through sealing in cans/pouches to increase portability of ready to eat products without affecting its nutritional quality.

A complete canning unit is required for the processing of vegetable curries, ethnic food recipes and regional cuisines to increase the self-life and availability throughout our country. The unit consists of complete unit of retort system for can/pouch, pre-processing equipment for different vegetables and packing facility of end products.

The unit made of SS and complies with all requirements of calculating process parameters and utilities. We expect established vendors, who already supplied same/similar unit to the industry/institution/university for the related purposes and expertise in fulfillment of needs based requirements of customer.
