CSIR-IHBT invites Expression of Interest (EOI)
for

“Bioactive leads for therapeutic use”

CSIR-IHBT invites expression of interest (EOI) from interested parties from Industries / SMEs / Progressive Entrepreneurs for licensing technology for Process technology for identification / screening of natural leads for therapeutic use.

Bioactive compounds in small quantities in foods and plants like fruits, vegetables, nuts, and oils have garnered significant attention for their potential in preventing chronic diseases. These compounds, including polyphenols, carotenoids, vitamins, omega-3 fatty acids, organic acids, nucleosides, nucleotides, and phytosterols, are increasingly recognized for their health promotion. With consumers seeking natural and sustainable solutions to enhance their quality of life through personalized nutrition, bioactive compounds are emerging as promising disease prevention and treatment alternatives. Some of the Salient Features are as:

- Bioactive compounds show potential in cancer prevention and treatment of tuberculosis. Additionally, they possess neuroprotective properties that may mitigate neuronal damage and inflammation in various neurological diseases.
- We provide computational virtual screening and hit validation employing robust and enhanced sampling in structure-based in-silico analyses.

The application should include details of company profile and marketing strategies. The selected parties shall be called for discussions.

Interested parties may send their Expression of Interest, in a sealed cover superscripting “Expression of Interest” addressed to
