“Rearing protocol for *Zophobas morio* (Superworms) as animal feed”

CSIR-IHBT invites expression of interest (EOI) from interested parties from Industries /SMEs / Progressive Entrepreneurs for licensing technology for Rearing protocol for *Zophobas morio* (Superworms) as animal feed.

Zophobas morio (superworms) is rapidly gaining recognition as a high-quality protein source in the pet and poultry feed industry. Renowned for their exceptional nutritional profile, superworms serve as a valuable feed option for fish, reptiles, poultry, dogs, and exotic pets. Their rich protein content, coupled with essential amino acids and lipids, makes them a superior alternative to conventional protein sources such as fishmeal and soybean meal. Furthermore, their efficient feed conversion, low resource requirements, and reduced environmental footprint position them as a sustainable and cost-effective solution for the growing demand for eco-friendly animal nutrition.

Salient Features:

- An efficient, user-friendly, easily scalable protocol for year round production of Superworms as animal feed.
- Superworms can be used as feed option for fish, reptiles, poultry, dogs, and exotic pets.

The application should include details of company profile and marketing strategies. The selected parties shall be called for discussions.

Interested parties may send their Expression of Interest, in a sealed cover superscripting “Expression of Interest” addressed to:
